Class Web Site: www.tjtaxlaw.com/uh-tf.htm

1. Book: Townsend, Campagna, Johnson & Schumacher, Tax Crimes (Lexis-Nexis 2008), the description of which is at:
<http://www.lexisnexis.com/store/catalog/productdetail.jsp?prodId=72440>
Code: The relevant text of the Code (both 26 USC and 18 USC) provisions is in the book. These should be sufficient for the class. However, we have arranged with Lexis-Nexis to distribute to class members free of charge a disk that has federal criminal law Code sections along with headnotes from the cases and the federal rules of procedure.
2. The assignments will be provided on the Class Web Site. Check it periodically. We also may communicate particular assignments by email as well as the web.
3. We provide on the web site a questionnaire for each student to us which can be done over the web. The purpose is to give us information to contact you if we need to contact you on short notice. Of course, we expect that all necessary communications will be by email, but want this additional contact information just in case. Also, we need your input as to your goals for this class so that we meet your legitimate needs.
4. Please feel free to call either of us if you are having difficulty or for other comments or concerns as to the class. We prefer that you first struggle with conceptual problems, and call us only when you are stumped. That is how you learn best. If you continue to have difficulty, please call either one of us.
5. We value your active classroom participation. Active classroom participation is a learning process for all involved.
6. Thank you for your interest in this course. We expect each of you to work hard. We will work hard for you and do our best to provide you a meaningful learning experience.
7. This is a GRADED class. It is not Pass/Fail.
